WIP201610P L Series Engineering Specification

1. Scope

Feature
● High saturation current realized by material properties and structure design
● Low DC resistance to achieve high conversion efficiency and lower temperature rising
● Low Profile: 2.0 mm × 1.6 mm × 1.0 mm.
● Magnetically shielded structure to accomplish high resolution in EMC protection.
● Halogen free, Lead Free, RoHS Compliance.

Applications
WIP201610P L series is generic applied in portable DC to DC converter line.
● Smart phone, PAD
● DC/DC converter
● Thin-type power supply module,

2. Explanation of Part Number

W I P  2 0 1 6  1 0  P  2 R 2  M L

1  2  3  4  5  6  7

★ 1 : Series Name: Wire-wound type power inductor
★ 2 : Size Code: The first two digitals: length(mm), The last two digitals: width(mm)
★ 3 : Thickness in mm
★ 4 : Material code: Iron powder
★ 5 : Initial inductance value: 2R2 = 2.2 μH
★ 6 : Model code, Tolerance of Inductance ±20%.
★ 7 : Electrode type.
3. Construction & Dimensions

3.1. End termination: Ni/Sn

3.2. Construction & Dimension:

3.3. Recommend Land Pattern Dimensions:

4. General specifications

4.1. Temperature Specifications

Operating Temperature range : -40°C to +125°C
Storage Temperature range  : -50°C to +125°C

* The detail operating temperature describing can refer to 5.1 (7).
## 5. Performance Characteristics

### 5.1. Specifications

Note 1: Customized design is available, please contact us.

Note 2: All test referenced to 26℃ ambient

Note 3: Inductance tolerance +/- 20%

Note 4: Inductance is measured with Agilent® LCR meter 4285A (or equivalent) at 1MHz/1V.

Note 5: DC resistance is measured with HIOKI® micro-ohm meter RM3542 or equivalent.

Note 6: $I_{sat}$ means that DC current will cause a 30% inductance reduction from initial value.

Note 7: $I_{rms}$ means that DC current will cause part temp. rise to 40℃ whichever is smaller.
5.2. Current Characteristic

6. Reliability and Test Condition

<table>
<thead>
<tr>
<th>Test item</th>
<th>Test condition</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Resistance to Solder Heat | 1. Solder temperature : 260 ± 5℃  
2. Flux : Rosin  
3. DIP time : 10 ± 1 sec | 1. More than 95 % of terminal electrode should be covered with new solder  
2. No mechanical damage  
3. Inductance value should be within ± 20 % of the initial value |
| Adhesive Test             | 1. Reflow temperature : 245℃  
It shall be Soldered on the substrate applying direction parallel to the substrate  
2. Apply force(F) : 5 N  
3. Test time : 10 sec | 1. No mechanical damage  
2. Soldering the products on PCB after the pulling test force > 5 N |
| Temperature Cycle         | 1. Temperature:-50 ~ 125℃ For 30 minutes each  
2. Cycle: 500 cycles  
3. Measurement: At ambient temperature 24 hours after test completion | 1. No mechanical damage  
2. Inductance should be within ±20% of the initial value |
| Dry Heat Test             | 1. Temperature: 85 ± 2℃  
2. Testing time: 500 hrs  
3. Applied current: Full rated current  
4. Measurement: At ambient temperature 24 hours after test completion | 1. No mechanical damage  
2. Inductance should be within ±20% of the initial value |
| Humidity Test             | 1. Temperature: 60 ± 2℃  
2. Humidity: 90-95 % RH  
3. Applied current: Full rated current  
4. Testing time: 500 hrs  
5. Measurement: At ambient temperature 24 hours after test completion | 1. No mechanical damage  
2. Inductance should be within ±20% of the initial value |
7. Taping Package and Label Marking

7.1. Carrier tape dimensions

<table>
<thead>
<tr>

<td>5 reels / inner box</td>
</tr>
</tbody>
</table>
7.3. Taping specifications

There shall be the portion having no product in both the head and the end of taping, and there shall be the cover tape in the head of taping.

7.4. Label Marking

The label specified as follows shall be put on the side of reel.

(1) Part No.
(2) Quantity
(3) Lot No.
   * Part No. And Quantity shall be marked on outer packaging.

7.5. Quantity of products in the taping package

(1) Standard quantity: 3000pcs/Reel
(2) Shipping quantity is a multiple of standard quantity.

8. Precautions for Handling

8.1. Precaution for handling of substrate

Do not exceed to bend the board after soldering this product extremely.

(references examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another components.
  If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend to use the machine or the jig to break it.

8.2. Precaution for soldering

Note that this product will be easily damaged by rapid heating, rapid cooling or local heating.

Do not give heat shock over 100°C in the process of soldering. We recommend to take preheating and gradual cooling.
8.3. Recommendable reflow soldering

Reference IPC-020c-5-1

8.4. Soldering gun procedure

Note the follows, in case of using solder gun for replacement.

(1) The tip temperature must be less than 280°C for the period within 3 seconds by using soldering gun under 30 W.

(2) The soldering gun tip shall not touch this product directly.

8.5. Soldering volume

Note that excess of soldering volume will easily get crack the body of this product.

8.6. Taping Package Storage Condition

Storage Temperature : 5 to 40 °C
Relative Humidity: < 65%RH
Storage Time : 12 months max
