- 7 Precautions for Handling
  - 7.1 Solder cream in reflow soldering Refer to the recommendable land pattern as printing mask pattern for solder cream.
    - (1) Print solder in a thickness of 150 to 200  $\mu$ m. Dimensions: millimeters (inches)

- 7.2 Precaution for handling of substrateDo not exceed to bend the board after soldering this product extremely.(Reference examples)
  - Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
  - Do not bend extremely the board, in mounting another components. If necessary, use back-up pin (support pin) to prevent from bending extremely.
  - Do not break the board by hand. We recommend to use the machine or the jig to break it.
- 7.3 Precaution for soldering

Note that rapid heating, rapid cooling or local heating will easily damage this product.

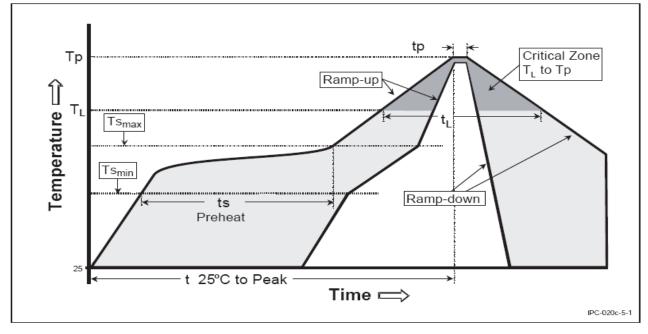

Do not give heat shock over 100°C in the process of soldering. We recommend taking preheating and gradual cooling.
